# Abstract

**Luke Trade** was released by a team of professional crypto-traders with five years of rich experience and blockchain developers as well as professional marketers. The token will be used to collect the liquidity pool and further trading of the collected liquidity pool, as well as profit distribution among token holders. The liquidity pool trading token uses all the mechanisms of the ethereum blockchain and has also been audited by independent experts. The token will serve as an analogue of AAVE's Flash Loan. It is also used as the project's settlement currency to investors and holders.

# About Luke Trade Token

**The purpose of creating a token is to make it a payment and credit instrument, as well as an analogue in the form of company shares. the new mechanism introduces a unique trading method into trading in the form of using a full bank of a liquidity pool in the form of leverage for short-term positions by stop limits, which eliminates losses in any plot, this mechanism works through its own unique smart contract on the ethereum network. As a result, trading becomes safer and more profitable, since it is no longer required to actually own the full purchase capacity. Luke Trade, will assist its clients in adopting this new way of trading.**

## How does it works?

**The client buys the Luke Trade token directly or through the exchange. Payment for a token in 100% quantity is added to the token's liquidity pool in the form of Eth and is blocked for 23 hours, then the liquidity pool is transformed into leverage for trading through a smart contract, Traders of the Luke Trade team use leverage and trade in markets with a stop limit and make a profit. At the end of the day, the profit from trading is divided in the ratio of 50% / 50%. The first part is added to the general liquidity pool and distributed among all holders in the percentage ratio of tokens on the wallet. By the end of the day, the liquidity pool will be unblocked for 1 hour so that investors can withdraw their funds if they wish. The second part of the profit will be used to promote the project and as payment for the work of developers.**

# Tokenomics

<b>The general issue of coins:</b>	<b>10 billion.</b>
<b>Marketing:</b>	<b>1 billion.</b>
<b>Liquidity pool:</b>	<b>7 billion.</b>
<b>The team:</b>	<b>1 billion.</b>
